## Professional Summary

Bachelor of Technology Electronics & Communication Engineering with hands-on projects experience in KiCad Schematic Capture, PCB Design, Microcontroller & Embedded Systems. Hands-on experience in STM32 board design, USB-C power delivery principles, CAN Bus Communication and electronic troubleshooting. Looking for an opportunity in PCB Design Engineer or Hardware Design Trainee position.

## Education

**SRM Institute of Science and Technology** — Kattankulathur, Chennai
*B.Tech - Electronic and Communication Engineering* — *Aug. 2022 – May 2026*
- GPA: 7.7/10

**Sri Kanchi Sankara Vidyalaya Matric Hr. Sec School** — Mayiladuthurai
*SSLC* — *Jun. 2021 – Mar 2022*
- GPA: 8.2/10

## Projects

**STM32-Based Embedded Hardware Board** | *KiCad, STM32, PCB Design* | GitHub — May 2026 – Jun 2026
- Developed an STM32 board layout using KiCad and arranged the microcontroller, power, and GPIO connections. I have been working on the placement of components and routing of the PCB.

**USB-C Environmental Monitor PCB** | *KiCad, PCB Design* | GitHub — Aug 2026 – Sep 2026
- Designed a USB-C-powered environmental monitor PCB prototype with emphasis on power connection and interface. Conducted schematic arrangement, footprint generation, components placement, and board design.

**Autonomous Vacuum Cleaner Using ATmega32** | *ATmega32, Sensors, Motors* — Aug 2025 - Oct 2025
- Contributed towards the development of obstacle avoidance robot based on Arduino UNO microcontroller and sensors for movement and direction control.

**BMS PCB Design — In Progress** | *KiCad* — Oct 2026 - Present
- Currently developing a battery-management-system PCB project. Working through schematic and board-design stages; repository link can be added once the project is uploaded to GitHub.

## Technical Skills

**PCB Design**: KiCad, Schematic Design , PCB Layout, Design Rule Check (DRC), Gerber File Generation
**Embedded Systems**: STM32, ATmega32, Embedded Linux, ESP32, Arduino
**Programming**: C, Python

## Certifications

**PCB BASIC DESIGN COURSE** — Sep 2026
*ALTIUM EDUCATION*
- Credential ID: cert_phj16kw5

## Publications

**CAN Bus Monitoring on Embedded Linux: A Real-Time Gateway Architecture**
*Bavinkumar G, Iniyan A, Mohammed Irfan M, Padmajothi V*
- Venue/Conference: 2026 International Conference on Smart Communication and Sustainable Technologies (ICSCST)
- Year: 2026
- URL: ieeexplore.ieee.org/document/11709757

## CERTIFICATIONS & PUBLICATIONS

- PCB Basic Design Course — Altium Education (Certificate ID: cert_phj16kw5).
- "CAN Bus Monitoring on Embedded Linux: AReal-Time Gateway Architecture for Automotive Networks" — ICSCST 2026.
