Professional Summary

Bachelor of Technology Electronics & Communication Engineering with practical experience in KiCad Schematic Capturing and PCB Designing, Microcontroller and Embedded Systems. Practical experience in designing the STM32 board, power supply using USB Type C port, CAN Bus communication, and electronic debugging. Seeking a job opportunity in the PCB Design Engineer or Hardware Design Trainee position.

Education

SRM Institute of Science and Technology — Kattankulathur, Chennai
B.Tech - Electronic and Communication Engineering; GPA: 7.7/10 — *Aug. 2022 – May 2026*

Sri Kanchi Sankara Vidyalaya Matric Hr. Sec School — Mayiladuthurai
HSC; GPA: 8.2/10 — *Jun. 2021 – Mar. 2022*
SSLC; GPA: 8.1/10 — *Jun. 2019 – Mar. 2020*

Projects

BMS PCB Design – In Progress | *KiCad* — Oct. 2026 – Present
Currently, designing a Battery Management System (BMS) PCB using KiCad, focusing on schematic development, component selection, and PCB layout.

USB-C Environmental Monitor PCB | *KiCad, PCB Design* | GitHub — Aug. 2026 – Sep. 2026
Designed a USB-C-powered environmental monitoring PCB concept, focusing on schematic design, component footprints, placement, routing, and power connections.

STM32-Based Embedded Hardware Board | *KiCad, STM32, PCB Design* | GitHub — May 2026 – Jun. 2026
Developed an STM32-based custom PCB in KiCad, integrating the microcontroller, power connections, and GPIO interfaces through schematic design and board layout.

CAN Bus Monitoring on Embedded Linux | *Embedded Linux, MCP2515* — Jan. 2026 – Mar. 2026
Developed CAN bus monitoring system and CAN gateway based on Embedded Linux, which is based on SocketCAN, using Kvaser CAN hardware, MCP2515 CAN modules, and Arduino nodes.

Autonomous Vacuum Cleaner Using ATmega32 | *ATmega32, Sensors, Motors* — Aug. 2025 – Oct. 2025
Worked in autonomous vacuum cleaner project where we used microcontrollers, motors, and sensors for detecting obstacles, avoiding them, and controlling movement.

Technical Skills

PCB Design: KiCad, Schematic Design, PCB Layout, Design Rule Check (DRC), Gerber File Generation
Embedded Systems: STM32, ATmega32, Embedded Linux, ESP32, Arduino
Programming: C, Python

Experience

Industrial Trainee Intern – Motherson — *Dec 2025 – Jan 2026*
Maraimalai Nagar, Chennai
Worked in a Robotic paint shop for automobile parts. Learned the complete robotic painting process, including primer application, base coat, and clear coat techniques. Contributed to troubleshooting errors in robots to ensure a smooth manufacturing process.

Certifications & Publication

PCB Basic Design Course — Altium Education — Sep. 2026
Altium Designer Essentials — Altium Education

Publication: CAN Bus Monitoring on Embedded Linux: A Real-Time Gateway Architecture for Automotive Networks
ICSCST 2026
